Ian Spiller Appointed General Manager Aberdeen O-Rings and Seals

High performance seals specialist, Precision Polymer Engineering (PPE) has appointed Ian Spiller as general manager for its Aberdeen O-Rings and Seals Ltd (AOS) business. With nearly 20 years experience of the offshore industry, Mr Spiller will be responsible for growing the company's Aberdeen and Norwegian seals business.

Formerly with ScanTech Air Supply, Ian Spiller's experience in compressors and pumps will be key to the on-going development of PPE's EnDura sealing range developed specifically for oil and gas applications. "Everyone involved in oil and gas exploration and processing knows the importance of selecting the right sealing material for their equipment. EnDura has an excellent track record in delivering high performance and longer-lasting sealing solutions. This, together with PPE's seal design and precision moulding skills, makes for an unbeatable combination in oil and gas sealing applications," said Ian Spiller.

Ian Spiller lives in Aberdeen and is married with four children. His hobbies include karate and acting as part-time mechanic for his son's radio-controlled racing cars.

EnDura – high performance elastomers for oil and gas

EnDura is a family of different elastomer types that offer superior chemical resistance compared to conventional explosive decompression grades, greater high and low temperature capabilities and are tested to the major international explosive decompression standards such as NOROSK M-710. The EnDura range includes HNBR, TFE/P, and FKM elastomers.
